MEMORANDUM FOR: John For Review

John:

At the time that we were going through our negotiation with NSA over the establishment of a direct hookup between our computer and NSA Headquarters, we made a bureaucratic mistake. We forgot to cut in the Office of Communications. [ ] has rectified this and has been in touch with Commo regarding the matter. Commo has jurisdiction over these types of activities and before they can start to work on this project they need some sort of documentation to establish the requirement.

That's what this memo is intended to do. If you see no problems with this we will have it typed in final for your signature and get it on its way.
